- GitHub, MongoDB, MySQL
- Able to design, build, and deploy a client-side & server-side web application
- Javascript & jQuery libraries and plugins
- CSS Frameworks, i.e. Bootstrap, Foundation, etc.
- Previous experience in Online Support functions through Instant Messaging & Inbound calls
- Ability to effectively overcome personal and organizational blocks to achieve results

## DEVELOPMENT PROJECTS

### Cadmium Art Events

<https://github.com/johnsoncm/cadmium>

<https://ancient-lowlands-14789.herokuapp.com/>

- A crowd sourced application for finding, exploring, and posting Art Events for the city of Richmond, Virginia
- This application was built with node using the MVC Framework. It has a MySQL database and Sequelize ORM, an Express server and restful API, and uses the handlebars templating engine for server side rendering.
- Developed by a team collaborating with Source Code Management through Github

### E-Commerce Back End

<https://github.com/sethvance26/E-Commerce-Back-End>

- The E-Commerce backend application stores data for different products, categories, and tags for items you may find on a E-Commerce website. .You can view, post, update, or delete data from any of these categories.
- A working, configured Express.js API that uses Sequelize to interact with a MySql database.

### Employee Tracker

<https://github.com/sethvance26/Employee-Tracker>

<https://drive.google.com/file/d/10lopFrnOohjneWHMSBO-3dtR5eKPAqi1/view>

- The Employee Tracker application builds a Content Management System, so that non-developers can view and interact with employee information within the database.

## EDUCATION

08/2021

*Certificate: Full Stack Web Development*

University of Richmond, Richmond, VA
